

## **Abstract**

The objective of the developed website was to promote the news and activities of the mangrove forest at Bangkhuntien district because there will only be a public relation board in Bangkhuntien, resulting in the difficulty and the general public cannot get news about mangrove forest. The researchers thus have developed a website to introduce mangrove forest at Bangkhuntien district by using Microsoft Visual 2010 and Microsoft Access to solve the problem and the District Office will be able to manage information such as adding, deleting, modifying and updating information to help reduce the working time of the Bangkhuntien district staffs in performing public relations and make people more convenient to access the news.
