Abstract

The instructional media is subjected to provide knowledge of the universe and a story about the world, the universe, and things in the sky together with adding zodiac story which lead to learning. Furthermore, the media is included cartoon media that helps children to think sequentially and strengthen skills. And the content can also be applied in daily life which enhances life experience and encourage the children to study. Audiences are able to pass on knowledge to others, either children in elementary level or other people. This term paper has been developed from Adobe Flash Professional CS6, Adobe Photoshop CS6 and Sound Recorder 9.8.3. To create animated pictures for students in elementary school (Grade1 to Grade 3), including the general public to make them see and understand the universe and the world more effectively.
