

Project Title : Android application M3U8 Video Player.
Credits : 5 Units
By : Mr. Teerawut Suwanpan 5604800010
Advisor : Miss. Thanaporn Rodcheewit
Degree : Bachelor of Science
Major : Computer Science
Faculty : Science
Semester / Academic year : 3 / 2017

Abstracts

From attending the cooperative education at D One Solution Co., Ltd., the importance of developing the M3u8 video player application has been recognized. Previously, the Company lacked the conferencing system through the application, resulting in customer's inconvenient usage. The author was assigned by the Company to develop the M3u8 video player Android application to enable users to enter the URL of the desired video. Users are more convenient to watch the video. This is also an alternative channel for watching video in greater convenience and fast use. It can be used anywhere and anytime through the Internet. Java language was used to develop the web application.

Keywords: Android application / M3u8 video file / D One Solution
