Abstracts

Knacx Corporation Company Limited is a full software developing company. It can develop a website, application, system, and design graphic. The company was trusted by several famous companies who are the leaders of this market. Knacx Corporation has developed an application named "Card me" which is about the working timesheet. Employees can record when they start to work and when they end their work through "Card me" application. However, "Card me" still not become popular due to there is a few websites promote and suggest this wonderful application. Therefore, Knacx Corporation assigns a website developing company to develop a website to promote the application "Card me". The website will present the application "Card me" about its functions, objectives of application's development, the prototype of the application, advantage, and also the contacts to Knacx Corporation Company. The website that was developed to introduce general people to know the application "Card me" better and also increase the sale volume to Knacx Corporation. The website was written using Subline Text 3 and the website's database was managed by My SQL.
