

Project Title	Portfolio System for Computer Science department of Siam University
Project Credits	2 Units
CandiDatas	Miss Chalita Mapituk 5204800145
Advisor	Miss Anchulee Chaiyarin
Program	Bachelor of Science
Field of Study	Computer Science
B.E.	2556

Abstract

Presently, not only the studying in the university but also the activity participation is necessary to unite students in faculties. In any students' activities, impressive moments are always kept in media. The students often put them in various webblogs and spread news about their activities through Facebook. That way is inconvenient in publicizing and monitoring their activities; therefore, we have an idea to development a system to demonstrate the students' activities in Computer Science. Thus, the students can accumulate their activity work, seminars, cooperative practices and thesis work plan. In part of lecturers and officers, this system will be helpful to release news about scholar activities and monitoring the students' activity participation.
