Abstract

Chantarakhet Mansion, has operated for over ten years, thirty-four with for rent rooms. Present operation information technology use computer to assist in the operation. The current operation is manual and records data in a paper such as a contract, invoice, and bill, resulting delayed in time, data loss, calculation error in rent and electricity charge, and using a lot of time to create a report. Therefore, I have developed a Chantarakhet Mansion Management System to assist the operation for convenient, rapid, easy to find information and reduce the errors. To be developed as a web application and store data in a database that will support the future business expansion. The system developed with PHP, JavaScript, HTML5, CSS and manage the database with MySQL.

Keywords: Apartment management system, Web application, Database system
