### Abstract

This online project management system was designed to enhance management efficiency of the Pixel Interactive Co., Ltd. as it will facilitate communication and other operations of the company. The application includes the front-end which is the web design for a client, and the back-end for internal data management. Functions that are available in this system include a table for progress report, a display for public holidays calendar, online chat and Skype communications. The system was developed with MVC (Model View Control) and coded in C# program, CSS, and HTML5. Additionally, the SQL was used to program the Microsoft Visual Studio 2017, and data management was achieved by using the Microsoft SQL Server 2017.

**Keyword:** Pixel Interactive Co., Ltd., Online project management system, Chat communication system
