### **Abstract**

The purpose of this project is to develop Student Activity Information of Siam University System. This project can help to improve public relations and recording activity hours. We did gathering requirements from students. Then we did analyzed and developed using Macromedia Dreamweaver CS6 with PHP (Personal Home Page Tools) language version 5.2.6 and MySQL version 5.0.51b as a database management and use program Apache version 2.2.8 as a web server. This program can manage information and apply for the activities and evaluate activities. The result of this project is higher performance of public relation. Users can find information easier and has special channel to search news and activity of Siam University.
