

ACKNOWLEDGMENTS

During the preparation of the master's thesis, I have received a lot of invaluable helps from many people. Their comments and advice contribute to the accomplishment of the thesis.

First of all, I want to express my heartfelt thanks to all the teachers who have helped and taught me in this university.

Secondly, I want to thank all the authors whose books and articles have inspired me in the entire process of finishing the thesis.

Finally, I am indebted to my parents for supporting me to do whatever I want to. I also need to express my gratitude to all my friends. I am particularly grateful to Zhu Yushiqiao, She has always urged and encouraged me.
