

ACKNOWLEDGMENTS

During these 2 years' time, as a graduate student in this university and in this foreign country, I learned a lot and it meant a lot to me. During this period of time, I have devoted most of my energy to my study and some of my lifetime to a part-time job. But what I would like to express the most is my gratitude and appreciation to this experience.

After these 2 years' life in Thailand, what I gained most is the help from all my classmates, teachers and leaders of the University of course. With these help, I am able to pass the final stage of my graduating essay. They mean a lot to me. I would like to give my best regards to my instructor Doctor. Indeed, without the instruction and the guidance, I cannot finish my dissertation as a graduate. There are lots of lovely classmates that I want to give my thanks to because we together have helped to each other all along the way, supporting each other, giving each other help whenever necessary. Finally, my parents are also essential part of my life. Without their financial and spiritual help, I will be very lonely in this foreign land. Best wishes to you all!
